Global Series Signaling Platform – Amplified Speaker

Federal Signal G-Series Amplified Speakers are designed for rugged industrial public address and general alarm applications. These models are available in explosion-proof “Ex d” versions and increased safety “Ex de” wiring box versions and are certified for gas Group IIC environments.

G-Series Amplified Speakers are capable of amplifying audio-level signals from either 0.8 Vrms or 2.8 Vrms systems and reproducing it at 15 Watt levels. G-Series Amplified Speakers work perfectly with ECHO Intercom systems, or with any application requiring audio amplification where ATEX or IECEx approval is required or desired.

The G-Series Amplified Speaker can be combined with all other G-Series audible and visual products in several custom configurations. Custom configurations can be ordered directly from the factory. Optional coupling kits, which allow limited field fixturing, are available.
